Just a quick up-date regarding Pineview. I've been having document exchange, and a few conversations, with John Krause of the BIA regarding BIA's intent to hire a contractor to review the ww operation at the Pineview facility. Although BIA has not yet hired a contractor to do this review, once the review is complete John suggests that all interested parties meet at the site to go over the main issues of concern. When this happens, I want to make sure Dave Wallis of RCAC can also attend, proceeded by his reviewing the contractor's findings. I don't think that this will be an issue w/ our current contract w/ RCAC, but will double-check w/ Helen McK.

The last couple of monthly gw monitoring reports from the site indicate that fecal coliform standards are being met, but nitrogen standards continue to violated.
